## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 6-9, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andersen (US3964943) in view of Polese et al (US6250127).

Andersen discloses a SiC strip heating element comprising a heating section (2), strip is non-hollow (Figures 1a-d), strip formed cold ends (3, 4), strip has a planar portion and a bent portion (Figure 2), strip is U-shaped (Figure 2), and strip has a curve in cross section (Figure 2).

Andersen does not disclose an extruded strip with a cross sectional aspect ratio greater than 3:1, 5:1, 10:1, or 12:1. Polese et al discloses an extruded strip with a cross sectional aspect ratio greater than 3:1, 5:1, 10:1, or 12:1 (column 7, lines 7-14). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the cross sectional aspect ratio of Polese et al in the heater of Andersen because, a cross sectional aspect ratio allows structure having low density and adjustable thermal expansion to be manufactured for use in electronic microcircuit components.

***Allowable Subject Matter***

3. Claims 5, 10-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments filed 2/11/08 have been fully considered but they are not persuasive. In response to applicant's argument that no prima facie case of obviousness exists, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).
